👤 PROFILE

Aspiring Software Developer with a strong foundation in building fast, responsive web applications. Skilled in problem-solving, collaborating with teams, and eager to contribute to creating efficient and scalable solutions. Passionate about improving user experiences and optimizing application performance. Excited to begin a career in software development and grow with challenging opportunities.

📁 PROFESSIONAL EXPERIENCE

Rajmith

Software Engineer

04/2021 – Present | Gurugram

- Developed and maintained **scalable web applications** using **React.js and Next.js**, improving application performance and user experience
- Built **responsive and mobile-friendly UI components** using **Tailwind CSS, Material UI, and Chakra UI**.
- Integrated **RESTful APIs** with frontend applications using **JavaScript and Node.js**.
- Designed and implemented **backend APIs** using **Node.js and Express.js**.
- Managed and optimized **MongoDB databases using Mongoose** for efficient data storage and retrieval.
- Collaborated with **UI/UX designers using Figma** to convert design mockups into functional and pixel-perfect interfaces.
- Implemented **smooth animations and interactive UI effects** using **GSAP and Motion React**.
- Optimized website performance using **code splitting, lazy loading, and Next.js SSR/SSG features**.
- Built reusable and maintainable **component libraries** to improve development speed across projects.
- Worked with **authentication systems, protected routes, and user session management**.
- Integrated **third-party APIs and services** for enhanced application functionality.
- Improved **SEO and page load speed** for web applications using Next.js optimization techniques.
- Debugged and resolved frontend and backend issues to ensure **stable and reliable applications**.
- Collaborated with cross-functional teams including **designers, backend developers, and project managers**.
